

Readme file for “Katrina’s Children: Evidence on the Structure of Peer Effects from Hurricane Evacuees”

Scott A. Imberman

Adriana D. Kugler

Bruce I. Sacerdote

Data Access: The data used in this project is proprietary. In order to access the data for replication purposes researchers should do the following:

Houston – A research proposal must be submitted to the Houston Independent School District’s Research and Accountability Department. Instructions for submitting a research request can be found at <http://www.houstonisd.org/portal/site/researchaccountability>. Make sure to note in the request that you will be requesting that the data be provided directly by us. We will provide the data (both original and intermediary datasets) upon receiving written permission from Houston Independent School District and a copy of the researcher’s letter of approval from HISD.

Louisiana –

Programs: Following is a list of Stata .do files used to conduct the analyses in this paper along with the tables/figures they refer to.

Data Cleaning and Dataset Creation (LA)

school_level_means – Creates data set of school level means.

alt_scale – Cleans raw data and sets up data to use achievement scale scores.

alt_standardize – Cleans raw data and standardizes scale scores in grade and year.

alt_standardize2 – Cleans raw data and standardizes scale scores in grade and year using only non-evacuees in standardization.
