Notes: Standard deviations are provided in parentheses. Incumbent students are restricted to those used in the peer-effects regressions. Hence the Louisiana sample includes grade 4 from 1999–2000 through 2004–2005, grade 5 in 2005–2006, grade 10 in 2001–2002 and 2002–2003, grades 8 and 10 in 2003–2004 and 2004–2005, and grades 6–10 in 2005–2006 and 2006–2007. The sample in Louisiana is also limited to schools where there are < 70 percent evacuees and excludes schools in Orleans, Jefferson, St. Bernard, Plaquemines, Cameron, and Calcasieu parishes. To maintain consistency with later regressions, we restrict to students who have a pre-Katrina outcome measure, with the exception of Houston evacuees since we do not have any pre-Katrina information on those students. LEAP scores are standard deviations of scale scores within grade and year. The standardization uses nonevacuees in schools where there are < 70 percent evacuees and excludes schools in Orleans, Jefferson, St. Bernard, Plaquemines, Cameron, and Calcasieu parishes. TAKS scores are standard deviations of scale scores within grade and year using statewide means and standard deviations. When students have multiple scores for a single subject in a given year we use the lowest score. Disciplinary infractions are the number of suspensions or more severe punishments in a year.
